

A Look at FTE Programs Summer 2012

“First, I cannot thank you enough for choosing me to be in this group of outstanding human beings. How did you find all of these amazing people? I absolutely loved and enjoyed every minute of the week. I have already told all of my friends about this amazing program and how much EFL has changed my life.”

“I thoroughly enjoyed Economics for Leaders! I really enjoyed the instructors – their ease with the students, their knowledge, and their sense of humor. The program was structured really well; the simulations were great; and, I will definitely be able to use what I learned in my classroom. Attending this program increased my enthusiasm for economic education in general and I plan to try to participate in additional FTE programs in the future. Thank You!”

“As a veteran teacher I have found that you never are too skilled to learn something new. Such was the case with this seminar. The leaders, staff and other students all provided new insights that I will carry into the classroom for years to come. The simulations and demonstrations were especially useful.”

Susan Gattis

“Thank you very much for allowing me this life-changing experience. I paid rigorous attention to the seminars because the instructors were so thorough and helpful, as well as incredibly entertaining. They made the lessons a breeze and each day it would surprise me that I was learning economics for three hours when I was laughing for a good half of it, simply because the teachers were so much fun.”

Adam Gerard

“I was blown away by this class and the amazing connections I made with it to my own teaching. I have already begun to look for future courses and cannot wait to learn more! Thank you for this class! It was an amazing treat for me!”

“I found the workshop one of the most valuable I have attended. The addition of students in the morning sessions greatly enhanced the efficacy of the simulations and the learning scenarios because we were able to watch a lesson in action and see students reason through a problem. Afternoon sessions focused on discussion and brought many voices and perspectives to light. I learned and shared information and techniques with colleagues. I particularly appreciated learning from Dan Benjamin – he is a master teacher who uses Socratic method – a true joy to watch a master at work.”
